

Eco-photovoltaic greenhouse San Pedro del Pinatar

Campo de Cartagena, Murcia

Commercial rooftop system that uses
Trina Solar multicrystalline modules

TSM-PC05 230W

2,2 MW

Commercial rooftop system

9.600

modules

3.126.528 KG CO₂

emissions avoided

“We were very pleased to have Trina Solar as a photovoltaic partner. Our R+D department has been able to develop a solution which combines perfectly both energy and agricultural production in a greenhouse. And the well known resistance of Trina Solar modules in agricultural environments and seaside areas fitted perfectly with this project”.
